Project Location : HJAlA, Atlanta, GA  
Weather : sunny  
Departure Time : 03/28/2025 10:00  
ASEC Technician Name : Vamsi Polisetty

Our AS Engineering & Consulting (ASEC) representative arrived on site to observe field activities. The following tasks were performed:

A topsoil sample was collected from the Luck Stone facility in Atlanta, Georgia. The sampling was carried out in collaboration with Selim from 2M Next and our representative from ASEC. During the collection process, two buckets of topsoil were gathered from the site for further analysis. One of the soil samples was sent to WSP Laboratories for testing, including a wash 200 test to evaluate the soil's drainage properties and an organic content to determine the amount of organic material present in the soil. The second sample was preserved for chemical analysis and will be sent to UGI Laboratories in Atlanta, where it will undergo testing to assess the soil's chemical properties.
