As requested, a representative from AS Engineering and Consulting (ASEC) visited the site to perform quality control inspection and testing services. Visual observation techniques were employed to verify compliance with project drawings/specifications, applicable codes, and approved material submittals. The following observations were made during the site visit:

The placement of 115 cubic yards of 3000 psi concrete for building pad was completed today.

Concrete observed on this date appeared to be placed in compliance with project specifications with regard to temperature, air content, and batch to placement time. Results are attached.

We appreciate the opportunity to be of service to you on this project. If you have any questions regarding this report, please feel free to contact us. We will be more than happy to discuss it with you.
