Arrival Time : 11/25/2024 07:30  
Onsite Hours : 9:30

ASEC Report ID : 74103  
Name of the Project : Naturewalk - 7 Hills Amenities  
Project Location : Dallas  
Weather : sunny  
Departure Time : 11/25/2024 17:00  
ASEC Technician Name : Vamsi Polisetty

As requested, the site was visited by our AS Engineering and Consulting (ASEC) representative for the purpose of providing quality control inspection and testing services. Visual observation techniques were employed to verify compliance with project drawing/specifications, applicable codes, and materials submittals. The following observations were observed on site this day.

#### Seven Hills: Amenities

- Upon arrival, the contractor was engaged in grading the roadway using a Komatsu PC 360LC and west of the job site. Fill was being transported with two tandem- axled dump trucks for the tennis court and parking area, while dozing was performed with a Komatsu 39px and compaction with CAT563E.
- The next lift of fill was started on the tennis court & parking area.
- Proof-rolling of the boulder fill was utilized to verify stability in lieu of density testing using a nuclear density gauge.
- Compaction testing was performed using a Troxler nuclear density gauge, along with general probing using a 3/8" diameter probe rod.

#### Nature walk: Lot Inspection (Lot #1000, #1001, #1002, #1003, #1004, #1005 and #1006).

- The contractor utilized a Komatsu D85EX bulldozer to perform the cutting of the slopes,
- In addition, a Komatsu PC210 LC excavator was employed for breaking up boulders today. Equipped with a hydraulic hammer, the excavator was used to break large rocks and boulders encountered on the site.

We appreciate the opportunity to be of service to you on this project. If you have any questions regarding this report, please feel free to contact us. We will be more than happy to discuss it with you.
