At the request of the client's representative, our AS ENGINEERING AND CONSULTING, LLC (ASEC) representative, Amin Azimi visited the job site to observe and monitor the contractor's work activities from a quality standpoint to assure compliance with project drawings/specifications, applicable codes, and materials submittals and conducted QC testing per the project drawings and specifications. The following observations were made on site for concourse B Gate B9, grease traps this shift:

- The writer visually inspected the installation and setup of these lanes and advised the contractor representatives of any minor corrections that were needed.
- The contractor cleaned loose rock and debris and standing water from the base.
- Baskets were found to be level, straight and secured.
- Dowel bars were found to have epoxy. Embedment length appeared to be 15 inches into concrete.
- Performed the sampling and casting of 7 beams
- Transferred previously cast test cylinders to our lab.
