

Date : 05/05/2025
Project No : 2024C314
Client Company : Manhattan Const.
Arrival Time : 05/05/2025 12:30
Onsite Hours : 05:00

ASEC Report ID : 81558
Name of the Project : Concourse B Grease Receptors
Project Location : HJIAIA
Weather : sunny
Departure Time : 05/05/2025 17:30
ASEC Technician Name : Aminullah Azimi

The field report you provided details quality control (QC) observations conducted by Amin Azimi of AS ENGINEERING AND CONSULTING, LLC (ASEC) at Concourse B, Gate B9, at Hartsfield-Jackson Atlanta International Airport. Here's a concise summary of the key activities and findings:

Field Observations Summary

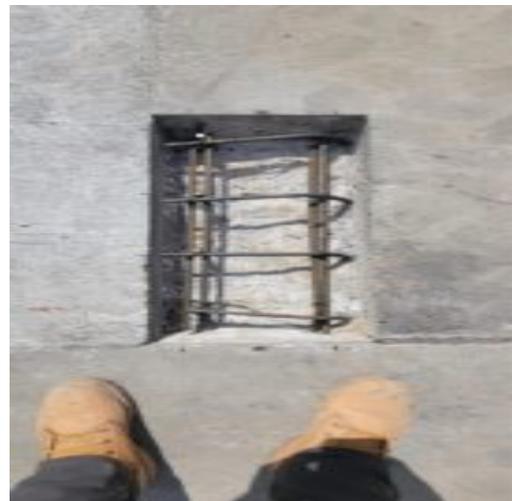

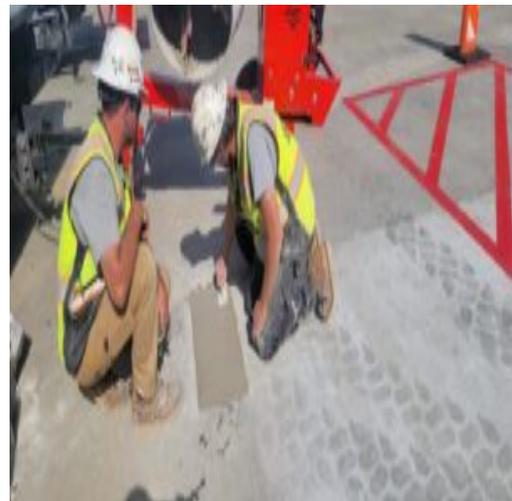

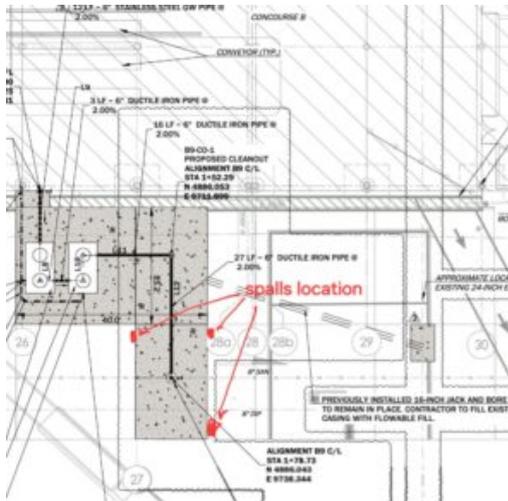

- **Flowable Fill Installation:** Observed the placement of 32 cubic yards of flowable fill around two 1,500-gallon grease interceptors.
- **Spall Preparation:** The contractor removed loose rock, debris, and standing water from the base of three spalls to prepare for repairs.
- **Reinforcement Bars:** Rebar within the spalls was found to have epoxy coating, with embedment lengths noted as per specifications.
- **QC Sampling:** Sampling for the spalls was not performed during this shift, as Manhattan representative Timothy Rutledge indicated it was unnecessary.
- **Spall Dimensions:** Three spall areas were documented with the following dimensions:
 - 22" x 9" x 5.5"
 - 22" x 12.5" x 5.5"
 - 30" x 12.5" x 5"

Photographs were taken to document the locations and conditions of these spalls.

We appreciate the opportunity to support you on this project. If you have any questions regarding this report, please do not hesitate to contact us. We would be happy to discuss the findings with you in more detail.
