Project Location : HJAIA
Weather : cloudy
Departure Time : 05/20/2025 20:00
ASEC Technician Name : Aminullah Azimi

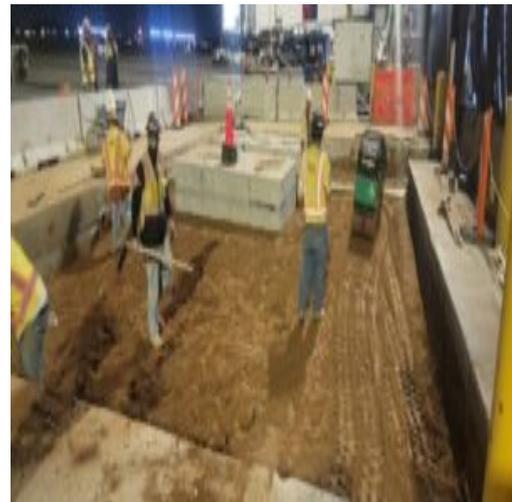

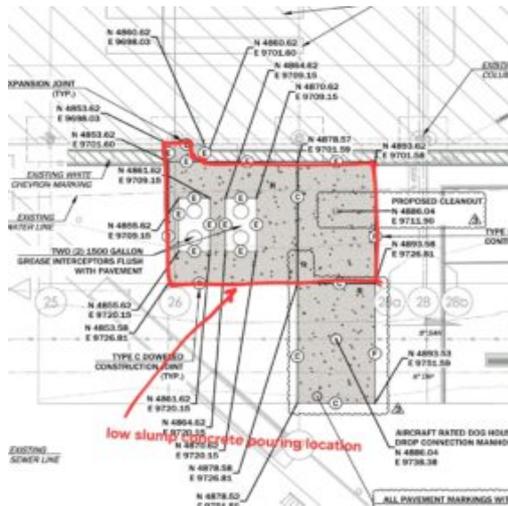

A representative from AS Engineering and Consulting (ASEC) conducted quality control inspection and testing at the Concourse B Grease Interceptor site. The inspection included visual observations to verify compliance with project drawings, specifications, applicable codes, and approved material submittals.

The placement of 36 cubic yards of low slump, low strength concrete was observed, and the concrete appeared to meet project specifications regarding temperature.

Subgrade compaction testing was performed using a 3/8" diameter probe rod.

Additionally, a set of six concrete cylinders (Set A) was transferred to the WSP laboratory for strength testing.

We appreciate the opportunity to be of service to you on this project. If you have any questions regarding this report, please feel free to contact us. We will be more than happy to discuss it with you.
