ASEC Report ID : 79122  
Name of the Project : Cottages at Villa Rica - Rock Blasting  
Project Location : Villa Rica  
Weather : Sunny  
Departure Time : 03/21/2025 13:00  
ASEC Technician Name : Micah Aycock

---

An AS Engineering and Consulting (ASEC) representative visited the Cottages at Villa Rica site to monitor drilling and rock removal operations. The contractor performing the work was Precision Blasting. The following observations were made on-site:

**Blasting Data:**

Today's blasting took place in the northern section of the development. It consisted of 8 laterals spanning from #127-#47 all in trench format. The total area calculated from today's blast was 1,512 square feet with a calculated trench rock of 356.72 cubic yards. These efforts are part of Precision Blasting's ongoing work to break up the small trench rock section in the northern section of the Cottages at Villa Rica. We appreciate the opportunity to assist with this project. Should you have any questions regarding this report, please do not hesitate to contact us. We would be happy to discuss any details further.
