As requested, the site was visited by our AS Engineering and Consulting (ASEC) representative for the purpose of providing quality control inspection and testing services. Visual observation techniques were employed to verify compliance with project drawing/specifications, applicable codes, and materials submittals. The following observations were observed on site this day.

Our ASEC representative was on site as requested and observed the grading contractor continue placing structural fill and topsoil for building Lots #87 thru #105. Our representative observed the contractor rolling the in-place layer of topsoil for the back yards of house lots using a sheep-foot compactor. The writer also performed density tests using a Troxler Nuclear gauge model 3430, serial no.38069 for fill placed on the building lots and roadway.

We appreciate the opportunity to be of service to you on this project. If you have any questions regarding this report, please feel free to contact us. We will be more than happy to discuss it with you.
