As requested, the site was visited by our AS Engineering and Consulting (ASEC) representative for the purpose of providing quality control inspection and testing services. Visual observation techniques were employed to verify compliance with project drawing/specifications, applicable codes, and materials submittals. The following observations were observed on site this day.

Our ASEC representative arrived on-site and spoke with the superintendent about today's activities. A proof-roll was performed on Lots #110 through #112 using a loaded tandem-axled dump truck. Proof-rolling found the subgrade to be stable and began placing fill in 12-to-18-inch lifts using an 815.

We appreciate the opportunity to be of service to you on this project. If you have any questions regarding this report, please feel free to contact us. We will be more than happy to discuss it with you.
