Weather : Sunny  
Departure Time : 10/16/2025 18:30  
ASEC Technician Name : Clyde Smith

As requested, the site was visited by our AS Engineering and Consulting (ASEC) representative for the purpose of providing quality control inspection and testing services. Visual observation techniques were employed to verify compliance with project drawing/specifications, applicable codes, and materials submittals. The following observations were observed on site this day.

On the above date our representative was on site to observe the grading contractor continue placing rock fill and compacted soil materials for the slope embankments and back of building Lots #69 thru #71 at depths of -16' to -10' toward Lot #71. The contractor also continued subgrade preparation, removing organic debris and topsoil from Lots #72 and #73. The rock fill placement observed was suitable for compacting efforts and density tests performed were in compliance with site specifications. The blasting contractor (Advance) made a blast shot today with a small amount of drilling at the Parkway sanitary sewer line.

We appreciate the opportunity to be of service to you on this project. If you have any questions regarding this report, please feel free to contact us. We will be more than happy to discuss it with you.
