Our AS Engineering & Consulting (ASEC) representative arrived on site to observe field activities. The following tasks were performed:

Observed the placement of fill/grading for a roadway section with a culvert crossing a small creek today. Compaction tests were performed using a nuclear density gauge. Generally, the results of density testing confirmed that fill compaction met the project and ASTM requirements. Results are attached in separate reports.

Please contact us if you have any questions regarding this report or of the density test results.
